

## HMAS Sydney's Wreck

5 June 2008

FRANK DAVEY

*(from Bardy Google, Vancouver: Talonbooks, 2012)*

The mystery surrounding the fate of the HMAS Sydney has never been solved.

Tim Akers says that HMAS Sydney lies two miles (3.2km) beneath the Indian Ocean, and that he pinpointed the ship's location from the comfort of his home in Wetherby, Yorkshire.

It is one of the world's great maritime mysteries: how could Australia's most distinguished warship fall prey to a poorly armed adversary.

HMAS Sydney was a genuine light cruiser.

A tiny, war-ravaged liferaft from the HMAS Sydney is our only physical link to Australia's worst-ever naval disaster.

Police in Geraldton are investigating the vandalism at the memorial to HMAS Sydney.

Of course, the greatest mystery in Australian maritime history is what happened to the HMAS Sydney.

The sinking of the HMAS Sydney, and the loss of her 645 crew members, shocked Australians deeply.

For a second time I have read in a Reuters piece a rather silly error about the HMAS Sydney II, the sunken Australian WWII cruiser.

New clues to loss of warship as wreck is found off Australian coast. One of the Royal Australian Navy's most grievous losses occurred in 1941.

Jewish troops found on HMAS Sydney.

HMAS Sydney was a battle-hardened Leander-class light cruiser of the Royal Australian Navy.

This has been all over the news here today, though I suspect interest is somewhat less outside Australia.

This page is dedicated to the search for HMAS Sydney II.

Is all really fair in love and war? It's one of a raft of ethical posers surfacing from the newly discovered wreck of HMAS Sydney, the warship at the heart of Australia's greatest maritime tragedy.

After 66 years, Australia's greatest maritime mystery is finally solved. Submersible robots will be sent to examine the presumed wreck of HMAS Sydney.

From here you can use the SocialWeb links to save HMAS Sydney wreck found off WA coast to a social bookmarking site.

Aussie WW2 ship's tomb reveals the harsh truths of war.

I'll tell you now he is somewhat upset after almost 20 years of looking for the wreck.

The recently discovered HMAS Sydney wreck shows that all lifeboats had been deployed.

To read more about the HMAS Sydney check out ScienceNetwork WA.

“I told them,” Carnarvon resident and HMAS Sydney researcher Lex Fullarton said after learning of the discovery of the World War Two wreck off Shark Bay.

But there was no mistaking that the wreck before us was that of HMAS Sydney and that her damage matched perfectly to what we expected from the side-scan sonar imagery.

Famed shipwreck hunter David Mearns has located the HMAS Sydney in nearly 3 km of water off the West Australian coast.

The sad saga of the fate of the HMAS Sydney can finally be put to rest.

Sunken wreck of HMAS Sydney reveals extent of the horrors suffered by the crew.

The first dramatic pictures of have been released by the search team that found the wrecks of the lost Australian warship HMAS Sydney and the German raider Kormoran.

Clear pictures of HMAS Sydney are expected to show massive damage to the decks of the sunken ship, but are unlikely to solve some of the enduring mysteries about the sinking with the loss of 645 lives.

IN THE account of German Captain Theodore Detmers, the Kormoran lured HMAS Sydney to within “somewhat more than a mile” before it hoisted the German naval flag and unleashed the full brunt of its armaments at 5.30pm on November 19, 1941.

FOUR former Northcote High students died when the HMAS Sydney was sunk in 1941.

Edmund Büttner vividly remembers seeing shells from his ship smash into the bridge of the Australian cruiser HMAS Sydney.

The first photos of the ship were today released, with one showing a large deck-mounted gun.

The first photos of HMAS Sydney have been released, and show the massive damage the warship suffered before sinking.

The first dramatic pictures of have been released by the search team that found the wrecks of the lost Australian warship HMAS Sydney and the German raider Kormoran.
